

Credit Name: CSE 2120 Data Structures 1

Assignment Name: CourseGrades

Decribe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

```
        scanner.close();
    }
}
}
class GradeBook {
```

Here i had two extra curly brackets for no reason i dont even know why they were there i think i mightve added some curly brackets at the end of a line of code and then realized that wasnt right and only deleted the first curly bracket, i fixed this by deleting the other curly brackets

```
        grades[i][j] = scanner.nextInt();
    }
}
}
```

I had the same problem here and i fixed it by removing the last curly bracket
