

Credit Name: CSE 2120 Data Structures 1

Assignment Name: Palindrome

Decribe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

```
import util.java.Scanner;
```

I put these the wrong way its supposed to be java.util.Scanner;

```
if(palindrome(input)) {  
    System.out.println("Your word " + input " is a palindrome");
```

I forgot an plus sign after input

```
String reversed = new StringBuilder(cleaned).r  
return cleaned equals(reversed);
```

I didnt put a dot between cleaned and equals
