

Instructions:

1. Click on File -> Make a copy

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	[MetricConversions]	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
<p>[The user will choose an option between 1-8 for the conversions they want: 1. Inches to Centimeters 2. Centimeters to Inches 3. Feet to Centimeters 4. Centimeters to Feet 5. Yards to Meters 6. Meters to Yards 7. Miles to Kilometers 8. Kilometers to Miles Please choose your conversion: Then after the user has picked a selection they will input the number they want to convert into the other metric]</p>	<p>[The computer will see which one they selected using a switch statement and then using their userInput being the number they wanted to convert it will run it through a math equation according to the conversion and then output the value]</p>	<p>[The user will see their number converted into whatever they chose to convert it too.]</p>
