Credit Name: CSE 2120 Data Structures 1																	
Assignment Name: EvensAndOdds																	
How has your program changed from planning to coding to now? Please explain?																	
The code seeme	d very simple to n	ne in the planning	phase, i just had to get 25 random	numbers and clas	ssify them as odd	or even and then	display it on the s	anges with my orginal plan like i had	d to switch from a	n array to an array	list just to make it	easier for me, tha	its really all i had to change though	and after some te	sting my code wa	s nice and clean
